## Education

Ph.D. candidate, Political Science, University of Iowa 2016 -

*Dissertation: Interconnected Rivalries*

*Abstract: This project examines the termination of interstate rivalries by focusing on dynamics in interconnected rivalries at the systemic, dyadic, and domestic levels. First, at the systemic level, I test whether a state's features in networks (e.g., popularity) and network configurations (e.g., triangle) affect the dissolution of rivalry ties. Second, the dyadic level of analysis focuses on the effects of network centralities and balanced/imbalanced triangular relationships on rivalry duration. Lastly, the domestic level of analysis examines what rival relationship matters in domestic politics by employing survey experiments in Japan and South Korea.*

*Committee: Sara McLaughlin Mitchell (chair), Kelly M. Kadera, Brian Lai, Elizabeth Menninga, and Paul F. Diehl*

MA, Political Science, University of Iowa 2019

MA, International Relations, Seoul National University (South Korea) 2013

BA, Political Science, Seoul National University (South Korea) 2011

## Additional Training

ICPSR Summer Program, University of Michigan Summer 2017

Game Theory 1 & Rational Choice Theories of Politics and Society

ISRC Workshops, University of Iowa Fall 2018

Python Basics

## Research and Teaching Interests

*International Relations:* International Conflict and Cooperation, Interstate Rivalries, Interaction between Domestic and International Politics, Regional Security (East Asia)

*Political Methodology:* Introductory Statistics, Network Analysis, Time Series Analysis, Duration Analysis, Spatial Analysis

## Book Chapter

[1] Lee, Bomi K. 2014. "North Korea's Peace Proposals in the 1970s," *Segye Jeonchi [World Politics]* 20: 323-370 [In Korean].

## Papers Under Review

[2] Lee, Bomi K., "Beyond a Dyadic Approach: Triangles, Major Powers, and Rivalry Duration" [Under Review]

Abstract: Why do some interstate rivalries last longer than others? Most rivalry literature focuses on the dyadic interactions within rivalries over time (temporal interdependence), but a considerable number of rivalries are connected to other rivalries (spatial interdependence). If there is a third country connected to two rival countries, this third party can be their common enemy (the enemy of my enemy is my enemy), common friend (the friend of my enemy is my friend), or one's friend as well as the other's enemy (the friend of my enemy is my enemy). Depending on the dynamics with the third country, the duration of the focal rivalry can vary. This paper examines the interdependence among rivalries by focusing on triangular relationships as well as power dynamics within them. I argue that rivalries embedded in balanced triangles are more likely to last, while rivalries in imbalanced triangles are more likely to terminate. Additionally, the third party's power status can affect rivalry termination. Analyses of rivalry duration show that rivalries are more likely to terminate when they have a common friend and particularly, the friend is a major power.

## Working Papers

[2] **Lee, Bomi K.**, "Formation and Termination of Interstate Rivalries"

Abstract: Do rivalry relationships interact each other? In other words, do existing rivalries lead to rivalry creation or termination? In this paper, I focus on the formation and termination of ties in rivalry networks considering the endogenous effects of rivalry relationships. In order to capture the network dynamics, I employ two temporal ERGMs: the Temporal Exponential Random Graph Models (TERGMs) with memory terms and the Separable Temporal Exponential Random Graph Models (STERGMs).

[1] **Bomi K. Lee**, Schmidt, Cody J., and Sara McLaughlin Mitchell, "Paths to Peace in Issue Rivalries"

Abstract: Conflict scholars examine how rivalry contexts and past militarization influence the chances for future conflicts, yet these approaches typically focus on dyadic interactions and ignore spatial interdependence. This paper moves beyond the dyadic rivalry context by considering how issue rivalry networks and extra-rivalry reputations influence peaceful and militarized conflict management in diplomatic issue conflicts. We capture interdependence by assessing the degree to which states are embedded in multiple rivalries using network analysis. We also identify how past behavior in issue claims influences states' reputations as credible negotiating partners. We find that rivalry networks constrain militarization by target states in issue claims but have no effect on challengers. Also, we show that reputation influences challenger and target states equally, with past reputations for incompetence resulting in more militarization and peaceful settlement attempts of issue claims.

## In Progress

[2] **Lee, Bomi K.**, "Do Doves Cry When They Face Multiple Rivals? Evidence from Survey Experiments in Japan and South Korea"

Abstract: What rival relationship matters in domestic politics? Some scholars show that leaders who cooperate with a rival country are more likely to be removed (e.g., Colaresi 2004). Although they examine the effects of policy choices (conflict v. cooperation) and

policy outcomes (success v. failure) on leadership tenure in the context of rivalry, they rarely discuss the countries facing multiple rival relationships. When a country has multiple rivals, the effects of conflictual/cooperative policies and their outcomes can vary depending on the characteristics of rival relationships. This article focuses on how the public approves of its leader's cooperative or conflictual foreign policies toward a rival country depending on the characteristics of rivals. For analysis, online survey experiments in Japan and South Korea are employed.

[1] **Lee, Bomi K.**, Sara McLaughlin Mitchell, Cody J. Schmidt, and Yufan Yang, "How Natural Disasters Influence Interstate Rivalry De-escalation"

**Abstract:** In this paper, we examine how natural disasters act as political shocks for interstate rivalry de-escalation and we consider how different types of disasters influence interstate conflict and cooperation dynamics. We argue that slow onset disasters (e.g. droughts) may increase resource competition between rival states, but they do not cause dramatic shifts in dyadic conflict relationships because both sides have time to adapt to the exogenous shocks. On the other hand, rapid onset disasters (e.g. earthquakes, floods) shock mutual threat perception and induce domestic resource crises that encourage leaders to cooperate with rivals. We compare the effects of slow and rapid onset disasters (EMDAT) on cooperation and conflict within rivalry dyads (with events data), with an expectation that rapid onset disasters provide more immediate opportunities for cooperation and dispute de-escalation.

## Research Experiences

### *University of Iowa*

PI on Doves Facing Multiple Rivals Project (online survey experiment in South Korea and Japan) August 2019 -

*Designed experiment/questionnaire and received the IRB approval (n=1,200 for each).*

Research Assistant on Project Haystack (with GoDaddy.com) for Prof. Caroline Tolbert and Prof. Karen Mossberger (Arizona State University) September 2018 - December 2019

*Cleaned raw data (n=20 million), visualized collapsed data (at the state/county/ZIP code levels), and conducted empirical analysis.*

Research Assistant for Prof. Elizabeth Menninga Summer 2019

*Combined civil war datasets (UCDP/PRIO Armed Conflict Dataset, Non-State Actors in Armed Conflict Dataset, etc), and visualized networks and empirical results.*

Research Assistant on Issue Correlates of War (ICOW) Project for Prof. Sara McLaughlin Mitchell Summer 2017

*Searched news stories for identity claims in Asia via LexisNexis.*

### *The Institute for Far Eastern Studies (South Korea)*

Research Intern for Prof. Jong-Dae Shin March 2015 - October 2015

*Searched and made a list of released governmental documents on the relationship between South Korea and North Korea.*

### ***Seoul National University (South Korea)***

Research Assistant on East Asian International Relations Theory Project for Prof. Wookhee Shin  
September 2012 - August 2015

## **Teaching Experiences**

### ***University of Iowa***

Instructor for Analyzing Political Data  
Spring 2020  
Guest Lecturer for Introduction to International Relations  
Spring 2018  
Teaching Assistant for Introduction to International Relations  
Fall 2016/2017, Spring 2018  
(Online) Teaching Assistant for Introduction to International Relations  
Summer 2018  
Teaching Assistant for Introduction to American Politics  
Spring 2017

### ***Iowa Social Science Research Center, University of Iowa***

Statistical Consultant  
Fall 2019 -  
*Taught workshops: Introduction and Data Management Using R, Network Visualization Using R, and Network Analysis Using R*

### ***ICPSR Summer Program, University of Michigan***

Teaching Assistant for Time Series Analysis 1  
Summer 2019  
*Taught six computer lab sessions with Dr. Desmond Wallace, and graded assignments.*

### ***Seoul National University (South Korea)***

Teaching Assistant for Introduction to International Relations  
Fall 2011

## **Awards**

The Frank J. Klingberg Best Paper Award, Cody Schmidt, **Bomi Lee**, and Sara McLaughlin Mitchell, "Climate Bones of Contention", International Studies Association Midwest (2019)  
Best Course Paper Award, "Dissolution of Rivalries and Formation of Warm Peace," Department of Political Science, University of Iowa (2018)

## **Grants**

Graduate College Post-Comprehensive Research Fellowship (\$10,000), Graduate College, University of Iowa (2020)  
Graduate College Summer Fellowship (\$5,000), Graduate College, University of Iowa (2020)  
Research Grant (\$1,000), Department of Political Science, University of Iowa (2020)  
Research Grant (\$1,400), Department of Political Science, University of Iowa (2019)  
Research Grant (\$500), Graduate & Professional Student Government, University of Iowa (2019)  
Travel Grant (\$150), International Studies Association-Midwest (2020)  
Travel Grant (\$200), American Political Science Association (2019)

Travel Grant (\$500), Department of Political Science, University of Iowa (2019)  
NSF Fellowship (\$900), Political Networks Workshops & Conference (2019)  
Travel Funds Award (\$750), Graduate Student Senate (GSS), University of Iowa (2019)  
Travel Grant (\$550), Department of Political Science, University of Iowa (2018)  
Summer Training Grant (\$3,300), Department of Political Science, University of Iowa (2017)  
Travel Grant (\$600), Department of Political Science, University of Iowa (2017)

### **Invited Conferences**

Visions in Methodology (VIM) at Claremont Graduate University (2020): postponed due to the COVID-19

University of Alabama's ISSR Workshop on International Conflict (2020): postponed due to the COVID-19

Minnesota Political Methodology Graduate Student Colloquium (2019)

### **Conferences**

#### *Paper Presentations*

American Political Science Association Annual Meeting (2020)  
Peace Science Society Annual Meeting (co-author) (2019)  
American Political Science Association Annual Meeting (co-author) (2019)  
International Studies Association Midwest Annual Conference (2017, 2018, 2019)  
Midwest Political Science Association Annual Meeting (2018)

#### *Poster Presentations*

International Studies Association Annual Conference (2020): canceled due to the COVID-19  
Peace Science Society Annual Meeting (2019)  
Political Networks (2019)

### **Professional Affiliations**

American Political Science Association  
International Studies Association  
Peace Science Society

### **Department Service**

Instructor, Math Camp for incoming graduate students, University of Iowa (2019, 2020)
